

North Carolina
Wesleyan College
Bulletin Supplement 1980-81

This booklet supplements the 1979-81 Bulletin, and is intended to provide students with more accurate and up-to-date information for academic year 1980-81. The 1979-81 Bulletin reflects curricular and course information as of May, 1979. This addendum reflects changes in courses, curriculum, and finances to May, 1980. For those interested, a limited number of copies of the 1979-81 version of the **Bulletin** are available from the Office of Admissions at Wesleyan.

N.C. Wesleyan College does not discriminate on the basis of race, religion, creed, national or ethnic origin, age, sex, or handicap in the administration of its educational policies, admission policies, scholarship and loan programs, and other school administered programs.

Addition:

1 Life Science

3 Semester Hours

Biology 1 (or 21) is prerequisite to all other courses in biology

A non-majors course for entering students with a minimum of science background. The course intends to explore the major concepts which involve animals and plants through lectures, demonstrations and films. It will also attempt to speak to the biological bases for the problems facing humans.

21, 22 General Biology

3, 3 Semester Hours

Biology 21 (or 1) is the prerequisite to all other courses in biology

A two semester introductory treatment of biology designed for entering majors and/or those with strong science preparation and inclination. The first semester (21) may serve as an area requirement, a terminal biology course in place of Life Science 1 for those students wishing a more advanced treatment of biology. Those students with adequate performance in Biology 1 (as determined by biology faculty affected, may enroll in 22, thereby bypassing 21).

22L Methods in Biology

2 Semester Hours

Prerequisite: Satisfactory completion of Biology 1 or 21

Laboratory experience in general biology. Taught in Spring Term.

50 Animal Behavior

4 Semester Hours

Prerequisite: Biology 21, 22, 22L (or their equivalents)

Major and current concepts in vertebrate behavioral research will be discussed. Topics will include genetics, mechanics, and evolution of behavior; social behavior; interspecific interaction; and problems in behavioral research. Readings, films, laboratory and field experiences will be utilized as appropriate. Preparation of a library research paper will be required.

Page 63

Addition:

71 Ecology

56 Interpersonal Relations**2 Semester Hours**

The course will focus on integrating theories from the behavioral sciences with interpersonal theory for the improvement of personal and professional interactions. This goal will be achieved by applying concepts of communication, group dynamics, crisis intervention and transactional analysis.

57 Leadership Theory**2 Semester Hours**

Theories of group behavior and organizational processes, the dynamics of planned change, and leadership theories are applied to nursing practice.

58 Health Assessment**2 Semester Hours**

This course offers the student the opportunity to learn to assess individuals of all ages under the direct supervision of nurse faculty. The student learns to take a complete health history and assess the biological-psychological and sociological status of individuals of all ages. Emphasis is placed on the normal well adult and/or child, with recognition of variation of normal.

72 Individual and Family Health**7 Semester Hours**

Concepts of family and wellness are introduced with emphasis upon family systems theory, health assessment, growth and development and therapeutic process. Experiences are centered around the evolving and expanding childbearing family and its bio-psycho-social-spiritual needs.

73 Community Health Nursing Theory**3 Semester Hours**

Systems theory (and concepts) related to changing patterns of community health nursing are explored in relation to individual, family and community health needs. Client advocate, change agent and nursing research roles are studied in preparation for distributive nursing practice.

74 Community Health Nursing Practicum 4 Semester Hours

Application of systems theory principles of community health nursing in guided clinical experiences in distributive settings. Through interaction with client families in the community, the student will assess the impact of the health care delivery system on the health-illness status of the individual, family and community.

75 Pathophysiology Theory**3 Semester Hours**

This course utilizes a conceptual approach to the adaptive and maladaptive responses to pathophysiological conditions as they relate to nursing practice.

76 Pathophysiology Practicum**4 Semester Hours**

Application of concepts of pathophysiology to nursing practice in the care of ill persons and their families.

77 Issues and Trends**2 Semester Hours**

Social, political, economic, moral and educational forces which are shaping society are analyzed to provide an understanding of the changing status of the health care system including nursing practice. Students initiate an exploration of topics of particular interest related to nursing practice, education and/or research.

80 Independent Study in Nursing**3 Semester Hours**

In depth study of a particular area or problem in nursing under the guidance of a nurse faculty member. Includes a seminar.
